Package Contents

- 1. Network Camera
- 2. Tools package (Screw Kit)
- 3. CD (Software, Manual,...etc.
- 4. Quick Installation Guide

B Installation

1. Push the housing release tab and remove the cover.

2. Fix the camera on the wall or ceiling with supplied screws, and twist viewing angle as necessary.

3. Adjust the tilt angle and focus as you desire.

4. Connect this camera to your network via a PoE Switch or PoE Injector. Ensure the connection is stable. * This camera requires PoE power.

5. Connect the network cable to the network camera.

6. Re-mount the cover.

7. Make sure to keep the network camera cover closed and the network cable fed out the desired path.

You can access your network camera by its web interface via web browser. Use the utility named 'IPFinder.exe' from the CD to find the IP address of the camera.

* The new network camera's default IP address setting is DHCP mode.

* The new network camera's default IP address: 192.168.1.99 if no IP address is provided.

1. Open 'IPFinder.exe' and press the 'Discover' button to search for all cameras within your local network. Press the 'Link' button to connect to a camera's web interface.

*Make sure all cameras are powered on and connect to local network.

lodel Name	Host Name	IP Address	Port	MAC Address	
MD-21	MD-21	192.168.0.101	80	D4:A4:25:00:48:AF	

2. If you need to change the camera's IP address, click 'Change IP' button on your selected camera to change the camera's IP address.
