GRG-4284

GRG-4284 is a next-generation Gigabit Passive Optical Network (GPON) ONT, ideal for Fiber to The Home solution designed for advanced triple-play deployments. It's an incredibly robust device allowing users to access a high-speed internet connection via its GPON port and share it with a Gigabit Ethernet port.

The indoor models of Comtrend's GPON product line provide a lower cost and small package which contains many features including QoS, Data Bridge and multicast video support.

Compliant with standard OMCI definition, GRG-4284 is manageable from the remote side and supports the full range of FCAPS functions including supervision, monitoring and maintenance.

KEY FEATURES

- **Access to Fiber Optical Network:** Supports downstream 2.5Gbps and upstream to 1.25Gbps with a transmission distance of up to 20km.
- **Easy Remote Management:**
 - GRG-4284 supports the ONT Management and Control Interface (OMCI), making it easy to configure, activate and manage remotely from an Optical Line Terminal (OLT).
